ter of Alphonse, has just passed a highly creditable examination at the Hotel de Ville, Paris, and received her certificate of competency as a school-mistress.

Newspaper writers in Japan have been cargo admonished not to disturb or demoralize the minds of the people by attacking the Constitution of the Government, by dis-cussing the laws, or by casting obstacles in the way of the working of national institutions, and even "moral teachings must not be introduced in such a way as to injure or obstruct the Government." Officeolders are protected by a rule providing that editors must not take it upon themselves to publish remarks upon officials during their term of office or upon their

JAMES COLTER, a quarry-man in the iron-works at Paducah, Kentucky, and lately a street laborer, has gone to England to get a fortune left him by his uncle, who died about seventeen years ago. The executors of the latter's will have been looking for the heir since his uncle's death, and only found him recently by accident. They are satisfied of his identity, and sent him money to pay his passage to London, where the property is that he inherits, and he left Hillman's for London about two weeks ago. The value of the property is in the neighborhood of \$200,000, part of it being a fine residence worth \$50,000.

mercury is never found in the coal forma-This may be true generally, but deposits, having been transported with the drifts of the glacial period. Be that as it may, the quick-ilver was there, and the chausen question to be answered is: "How did it After

A VERY eccentric newspaper man named James Johns recently ded in Starkboro, Vt. He used to print with his pen and issue occasionally the Autographer and Remarker, and send his edition, which con-sisted of from one to half a dozen copies to anybody he pleased. His work was very neatly done; he tried a printing press once, but didn't like it half so well as his pen, and so gave it up. He was very jealous of the fame of his sheet, and had no mercy on the man who said anything against it, or refused to exchange. Among his peculiarities was his abstinence from tea and coffee, and his feeling that he to him. The outrage of urging a man to take a cup of tea when at a friend's table was the subject of many a leader in the Autograph of twenty-five years ago.

onsisting of those instruments which are favorite resting place for all the adventurdesigned to gratify the cultivated musical taste of society, the other comprising tion they can feel for art. Sometimes, the igh not often, the unsuspecting disciple for the muse mistakes the second of these mire the prudence of these New York classes for the first, and invests the financial evidences of years of self-sacrifice in h a gaudy trunk full of noi-e. Then with it comes home to him the fact that there are pianos which are not pianos, but only a combination of indiscribable junk, pine boards, mucilaginous varnish, and night-It is this species of ear torture that infests the average boarding-house parlor, and on summer evenings disseminate headache throughout whole neighborhoods.—Golden Age.

A rew mornings ago a couple of Pittsburgh policemen found a young man kneeling in the street, with a prayer-book in his hand, shouting and praying in a loud voice. Believing that he was intoxicated, the officers attempted to arrest him, but he struggled so furiously that help had to be summoned befort they could convey him to the station-house. Here the resistance was renewed, and it seemed as if the prisoner was endowed with the strength of ten men. He was finally sub-dued and placed in a cell, and it then transthe young man came to this country a few days ago with his sister. Shortly after their arrival in Pittsburg the brother and sister became separated, and failing to find her, the young man became crazed with grief. A search was instituted and the sister found, but her brother failed to recognize her, and he is now in the asylum, his reason being entirely wrecked.

Cus- the house, a very serious matter was deto speak a word or make known the cause of her mistortune. It is the general opinion that the spell was either brought on eree against the Maine Central Railroad in the favor of a passenger for injuries suffered by a fit, or some terrible fright which the tayor of a drunken fellow passen, woman received while in the pasture, and the nature of which her friends have as yet been unable to learn."

Buried Treasure.

Ever since the story of Capt, Kidd gainvation nowadays wears her garters below her knees. The principal vein of the leg sinks there have all the principal vein of the leg sinks there have all the pursuit of a shadow. but all the story of Capt. Kidd gained currency, there has been no lack of persons ready to invest their money in the pursuit of a shadow. whimsical of all the searches for buried treasure is that which has just been undertaken, according to a San Francisco eformity may be avoided.

It is one of the admirable customs of from San Francisco for the Cocos Islands, the Hebrews that the sons and daughters with a crew under instructions to search are obliged to learn some practical trade for some millions of treasure buried there or useful calling; and it is in accordance with this that Mile. De Rothschild, daughsome little method, however, in the madness of these capitalists, for the erew departed with instructions to proceed, in case of failure to find the apocryphar treasure, to the pearl fisheries and there obtain a

The expedition is based upon the story of one David Sutherland, which is equally nantic and improbable. It begins with the assertion that in 1835 the brig Mary A war is said to have existed at fort contained a vast amount of treasure which was in imminent danger of capture. Of course the commandant could think of onveniently at anchor near at hand. It may be remarked also that it was perfectly natural that an out-of-the way fort should contain these "glittering millions." This part of the story, like all the rest, is eminently fit to be told to the marines. The treasure was no sooner on board the Mary Deer than the crew were tempted to sail away with it, and immediately ielded to the temptation. No sooner did the thieves find themselves in full possession of their booty than they were troubled about what they should do with it. They might have gone off to New York or Liverpool, and having told some story concerning wonderful riches in some hitherto anknown land, which would not have been travelers A BAIN-STORM at Hawesville, Ky., the half so strange as half the yarns of sailors, other day, did not excite much comment. have lived rich and respected ever after-but when globules of quicksilver began ward. But they did nothing of the kind. to be found in the gutters a good deal of They sailed away westward for thousands interest was felt as to where it came from. of toiles, passing by hundreds of equally The theories were as various as the men eligible sites for the concealment of treaswho advanced them. The only reasonable | ure, and finally buried their "glittering solution was that it came from the hills millions" on one of the Cocos Islands, near the town, but this is in contradiction which are situated in the Indian Ocean, off of the statement made by geologists, that the coast of Java. Even the marines would refuse to believe such a story as this, but something even more strange is tive is worthy of the incomparable genius

After the treasure was buried, and the acter for these usually placid seas that it ose where the treasure was concealed. they said it was buried. They counted upon escaping, of course, before reaching the end of this wild-goose chase, and equally as a matter of course they did it. The ship put into Panama without any varieties found in the Indian Ocean and Varieties for there the fish has received the unpoetical name of the Drum, the Drum, the Indian Ocean and Varieties for the Indian and North American varieties, for there the fish has received the unpoetical name of the Drum, the Drum, the Drum, the Indian Ocean and Varieties for the Indian O was grossly insuited if they were offered reason, and there one of the three died. and the other two escaped to an outwardbound w aler, leaving the Peruvians finally in the lurch. On this whaler they remained for several years, but finally de serted the ship at San Francisco, and af-PIANOS AND EAR TORTURES,-Two tersome experience in the mines, settled great classes of planos are produced, one down in California, which seems to be a

Strange Marine Animals.

Every class of the great animal kingdom contains two or three species which, by the singularity of their structure and habits, are entitled to be numbered among the wonders of natural history; but there is perhaps no class which can boast of so many curious examples as that which comprehends the finny tribes of sea, lake and river. Of these, there are none more remarkable than the so-called musical fishes of the East and West, the blind fishes of North America, and the volcano fish of the North America, and the volcano fish of the ed. The dorsal fin extends along almost

If there is one common characteristic of tral and pectoral fins are large and well all marine animals more marked than an other, it is their absolute silence, or, to it appears to be by no means numerous. other, it is their absolute silence, or, to coin a new word, voicelessness. The one exception to this, and we believe it is only an apparent exception, is the musical fish. It is found along the southern portion of the coast of the United States; in the West Indies, and on the tropical coasts of South America; in the Bay of Bengal; in the muddy creeks on the shores of India; around Ceylon, and along the coasts and in the fields around. They accumulated around Ceylon, and along the coasts and in the fields around. They a cumulated in immense heaps, and putrefying under island of Borneo. These are the localities in which its existence is recorded, but it the district. A few years after, when, on inches long and two inches thick into each in which its existence is recorded, but it the district. A few years after, when, on probably has even a wider range, and it is the 19th of June, 1698, the cone of Carguanot unlikely that it is an inhabitant of all not unlikely that it is an inhabitant of all the sub-tropical seas. Its music is only heard at night, or in the evening after the sun has set; and particular spots, often of very limited extent, seem to be haunted by the fish, for on sailing away from them, the sound becomes inaudible, and, on retaining the sub-tropical seas. Its music is only he mountains, streams of mud and millions of fish came pouring out, and the application of collodion to the teat immediately after milking. To apply it wipe the teat perfectly dry, and with a small brush or came!'s hair pencil paint the earthquake which destroyed Ribambao in Ecuador, chasms opened in the lower part. the sound becomes inaudible, and, on returning, it is again heard. The accounts of the volcano of Tunguragua, which of it given by travelers agree as to the main features of the facts, but, as might be Deer anchored off a Peruvian fort near expected, they differ in some details. The sound always seems to come up from the of hundreds of feet, and in the mud and the time between Peru and Chili, and the surface of the water in long notes, low and water there were thousands of dead pregclear, and perfectly distinct. Sir Emerson | nadillas. But the most remarkable Tennent, who heard it in 1848 at Chilka Lake, an inlet of the sea on the east coast no other means of saving it than to place of Ceylon, describes it as "like the gentle t on board a foreign vessel, casually but thrills of a musical chord, or the faint vi- On that occasion the mountain threw out bration of a wine-glass when its rim is rubbed by a wet finger \* \* \* not one old and raw, others half baked, and a sustained note, but a multitude of tiny sounds, each clear and distinct in itself, the standing their flery flight from the loftiest sweetest treble mingling with the lowest bass." Other and later visitors to the same spot have given a very similar ac-count of their experience there. fish seem, indeed, to abound chief abodes of the pregnadillas are not The off the Cingalese coast, and they have been met with out at sea in deep water at least a hundred miles from Colombo. This strange music has been heard, too, in the muddy creeks near Salsette and Bombay, and at Vizagapatam and along the Coromandel coast. Other mountain, or the earthquake cleaving its

musical fishes on a calm night among the islands of the Mergui Archipelago, off the Burmese coast, and in fresh water in the Sarumoth River in Borneo. Of these. some say the sound was a prolonged note, rising and falling like the strains of an Æolian harp; others compare it to music borne on the wind from a distant shore; and with others, again, it was a drowing, drowsy sound, all of one pitch, and seem ing not only to rise from the water, but to fill all the calm air around. The accounts minerals are found out of their natural to follow. In its later phases, the narra- of travelers in America are to the same effact M. de Thoron heard the sound in for lying exhibited by the celebrated Mun- I the Bay of Palion, in Ecuador, and in the river Mataje, and he compares it to that of a church organ heard outside the door of a arew went back to their ship, a storm arose, and it was of such an extraordinary charcalled by the natives Siren or Musico, beblew the crew back, despite themselves, plew the coast of Peru, where they were aptured, and eight of the eleven were captured, and eight of the eleven were they shot. The other three were back, despite themselves, who visited the caves of the Bacos Islands near Trinidad where the Bacos Islands near Trinidad where the account of the Bacos Islands near Trinidad where Islands near Trinid and were put upon a ship which started for the Gallipagos Islands, where they said it was buried. They counted the West Indian and North American to

record having listened to the

more than this, and are well deserving of their title of musical fishes. What fish it is that produces those sounds as yet, more than uncertain. It is, indeed, a question of some difficulty to determine. American naturalists are generally agreed that the musical fish of the eastern coasts and of the West Indies is a large fish, known to zoologists as the Po ains chromis. It grows to a length of about five feet, and swims about in In its gullet there are three shoals movable plates, covered with large teeth. and it is supposed that it is the action of these that produce the drumming sound. Of course, anything like a real voice would be an impossibility; but the least noise travels a great way under water, and would be heard distinctly by any one on its sur-The Cingalese at Chilka Lake told | ness of water. If water could only be got Emerson Tennent that the singers there were shell-fish, and he himself inclined to the same opinion; but it appears ty, for the water, instead of exploding, very improbable to us that it is so. Other writers have suggested that the musician Smyth, writing on the subject, states that writers have suggested that the musician is a fish furnished with a sucking appa

ratus, by means of which it can attach itself to the bottom of a ship or boat, and could by no means be persuaded to go be-that its musical instrument is the row of low the surface. But "when he took a suckers on its head. There is, however, very little evidence to support this theory.

The fact, that by applying the ear to the side of the boat, the volume of the sound effect. Moreover, the music has been heard in places where no sucking-fish has been enterprising mechanic. A machine some enterprising mechanic. A machine ing binself on Euclid avenue and impair some enterprising mechanic. A machine some enterprising mechanic. A machine ing binself on Euclid avenue and impair will be the certain result. The one sure method of right one. He can remove every speck of avoiding such an unpleasant catastrophe is to explode water drop by drop would right one. He can remove every speck of dust from the furniture of an office or days from the furniture of an office or have great power. It is on record that have great power, works were blown up A little story was told to us lately which nto a certain asylum in New York—a little at Salsette, near Bombay, attribute the mon perch; and those at the Bay of Pailon | certain large copper works were blown up | say that it is a white fish, with bluish spots | by one of the workmen spitting into a on the back, and about ten inches long, which they catch on the spot during the fluid exploded, instead of passing off in She has no mother: she is an the mere hooking of a fish near the boat She has no friends. eats neither.—Josh Billings.

er, and it wan't a fust-rate night for

A correspondent of the Hartfort Times, iting from Cuba, makes this statement: No doubt the reader will open his eyes t oysters growing on trees. Often have at oysters growing on trees. I seen the sneer of unbelief on the face of the ignorant when the fact has been mentioned: but grow they do, and in immen quantities, especially in the southern part of the island. I have seen miles of trees, the lower stems and branches of which were literally covered with them, and many a good meal have I enjoyed with very fittle trouble of procuring. I simply placed the branches over the fire, and when opened I picked them out with a fork or pointed stick. These peculiar shell-fish are indigenous in lagoons and swamps on the coast, and as the tide will rise and the spray fly so will they cling to the lower parts of the mangrove trees, sometimes four or five feet deep, the mangrove being one of the very few trees that flourish in salt water.

WILHOFT'S TONIC!-A SAFE, SURE, AND SCIENTIFIC CURE!—The unprecedented sale of this world-renowned medicine proves incontestibly that no remedy has superseded the use of this reliable Tonic. No spleen has been found so hard as not to yield to its soft-ening influence, and no liver so hypertrophied as not to give up its long-retained bilious se-cretions, and no Chill or Fever has yet refus-

HABITUAL constipation leads to the following results: Inflammation of the kidneys, sick and nervous headache, biliousness, dyspepsia, indigestion, piles, loss of appetite and strength; all of which may be avoided by being regular in your habits, and taking, say one of Parsons' Purgative Pills nightly for four or six weeks.

Johnson's Anodyne Liniment may be used to advantage where any Liniment is desira ble. In cases of severe cramps and pains in the stomach, it is undoubtedly the best article that can be used internally.

ATTEND to the first symptoms of Consump

tion, and that disease may be checked in its incipiency. Use immediately Dr. Wishart's Pine Tree Tar Cordial, a safe remedy in all liseases of the lungs. A PROTRUDING toe is not a pretty sight, and is never seen where children wear SIL-VER TIPPED Shoes. They will save half your shoe bills. For Sale by all Dealers.

DISEASES!! It is the vital principle of the Pine Tree, obtained by a peculiar process in the distillation of the tar, by which its highest medicinal properties are retained.

Tar even in its crude state has been recommended by eminent physicians of every school. It is confidently effered to the afflicted for the following simple reasons:

1. It cums,—not by abruptly stopping the cough—but by dissolving the phicgin and arising nature to throw off the unhealthy matter causing the irritation. In cases of scated consumerion it both prolongs and renders less burdensoune thelife of the afflicted sufferer.

2. Its healing principle acts upon the irritated surface of the lungs, fenetrating to each diseased part, relieving pain, and subduing inflammation.

3. It pursues and ensuches the moon. Positively curing all humors, from the common primers of ensurement to the severest cases of Scrobia. Thousands of affidavits could be produced from those who have of affidavits could be produced from those who have felt the beneficial effects of PINE THEE TAR CORDIAL In the various diseases arising from IMPURITIES OF It invigorates the digestive organs and restores e appetite.
